

April 26, 2022 (62 day)

To date, 931 settlements have been de-occupied. The damaged infrastructure of the temporarily occupied territories is being restored. Humanitarian aid and food are brought to people. Demining of these areas is also underway.

Last night it became known that the Russian military seized the building and removed the flag of Ukraine from the **Kherson** City Council. The occupiers presented the new so-called "head" of the Kherson regional administration and the "head" of the Kherson city administration. Kherson region is on the verge of a humanitarian catastrophe.

Sumy region was shelled from the territory of the Russian Federation.

It is reported that 3 people were killed and 7 were injured in the Russian shelling of **Kharkiv** today.

Enemy shelling and blockades of Ukrainian units near the Azovstal plant in **Mariupol** continue. During the night, 35 air strikes were carried out, one of the plant's shops caught fire, and civilians who were still hiding there were injured. The occupiers do not give food to the men until they join the forced labor: dismantling the rubble or arranging mass graves.

This morning, the Russian military launched a missile strike on the **Zaporozhia region**. Two guided missiles of the occupiers hit the territory of one of the city's enterprises, one person was killed and one was injured. Infrastructure facilities of the enterprise were also damaged and destroyed.

In the **Mykolaiv region** because of night attacks from a shrapnel wound the man in own house was lost.

In **Luhansk region**, houses were damaged due to heavy shelling of Popasna, Rubizhne and Lysychansk. Russian troops in Rubizhne are forcing women to conduct reconnaissance, threatening to shoot their children.

In the **Donetsk region**, three civilians were wounded in the night shelling, two people were killed during the day, and six were injured.

In the **Odesa region**, the railway bridge across the Dniester estuary was damaged by rocket fire.

The head of the IAEA said that after a month of occupation, the level of radiation at the **Chernobyl** nuclear power plant is much higher than normal.
